

# Swire Coca-Cola Business Churn Prediction

Cole Lifer

Jordan Harmer

Richard Garbett

### **Problem Statement**

What is Swire looking for?

What Can They Offer?

What are the Risks?

- Profitable investment
- Longevity
- Loyalty

Discounted pricing for loyalty

Various Incentives

- Incentivizing unprofitable customers
- Equipment Loss

## **Dataset**

#### **Problems**

- Onboarding date
- Outliers in dates
- Unclear target variable

#### **Positives**

- Diverse dataset
- Few missing values
- Categorical variables

### **Exploratory Data Analysis**

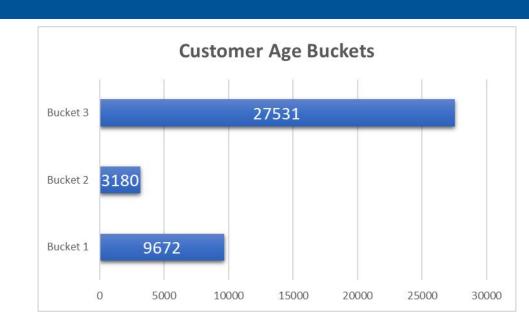

### Transaction Size and Customer Age

- Average Customer Age: 8.8 years
  Invoice Range: \$-90.95 to \$1.8M
  Transaction Count Range: 1 to 468

### **Exploratory Data Analysis (Continued)**

#### **Customer Age Buckets**

- 2 years or newer = Bucket 1
- 2- 3 years old = **Bucket 2**
- 3+ years old = Bucket 3

# Initial Model Development

#### **Random Forest**

- Inherent feature selection
- Handles large volume of predictors
  - More prone to overfitting
     (Far less than single decision tree)
    - Compute intensive
- Imbalanced datasets = problematic

#### **Naive Bayes**

- Efficient
- Better for categorical data
- Not optimal for rare situations
   (Pros & Cons)
  - Baked-in assumptions (variable independence)

# Model Selection

- - Admirable Performance from Both
- Iterative Process
  - Evaluate, Process, Edit, Re-evaluate

# Model Iteration

- ▼ Variable Reduction
  - Chi-squared test
  - Overlapping areas
- **▼** Downsampling Strategies

★ 60/40 Train/Test Split

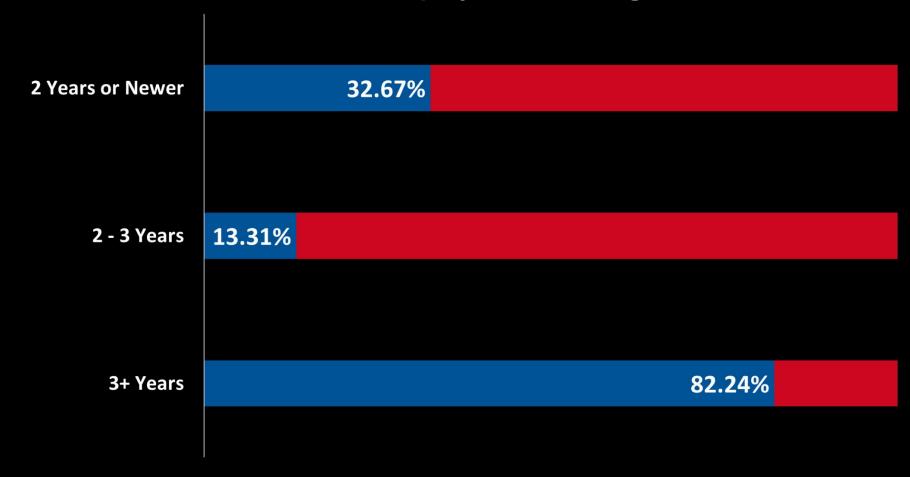

→ 3-fold cross validation

# Performance Metrics

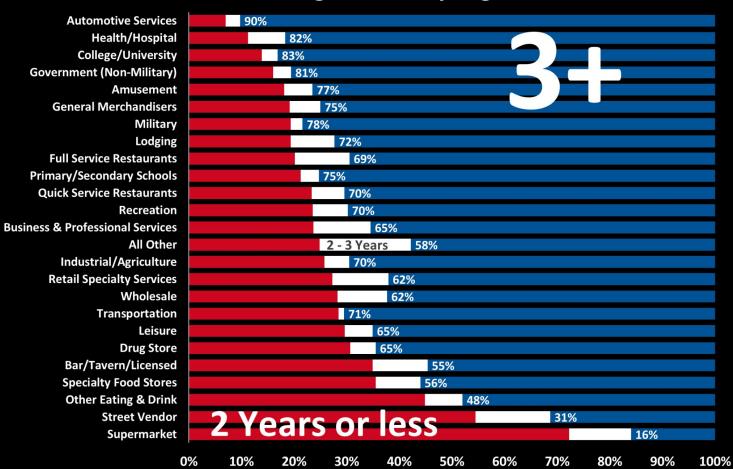

- 67% Mean Accuracy
- Best Proficiency in Third Bucket

Titles	Fold 1	Fold 2	Fold 3	Mean	Std. Dev.
Accuracy	67.25	67.72	67.11	67.36	0.32
Precision (1)	41.45	43.09	42.22	42.25	0.82
Precision (2)	30.8	31.37	36.4	32.85	3.09
Precision (3)	72.72	72.58	72.6	72.63	0.07
Recall (1)	25.25	24.57	28.29	26.03	1.98
Recall (2)	8.4	8.02	7.83	8.08	0.29
Recall (3)	88.81	89.78	87.6	88.73	1.09
F-score (1)	31.38	31.29	33.88	32.18	1.47
F-score (2)	13.19	12.77	12.89	12.95	0.22
F-score (3)	79.96	80.27	79.4	79.88	0.40

### **Prediction Accuracy by Customer Age Bucket**

#### **Customer Age Bucket by Segment**

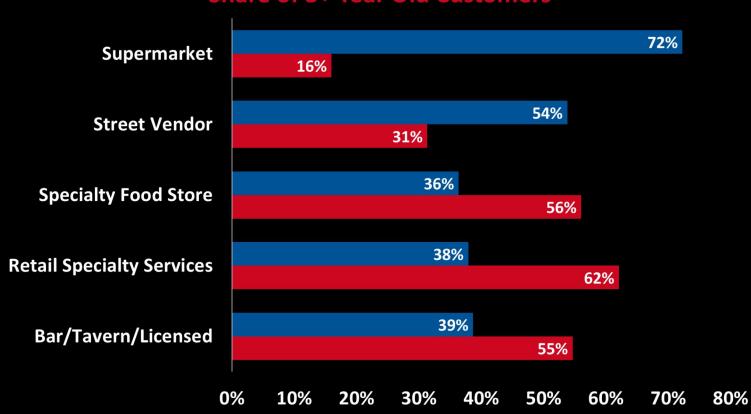

#### **Prediction Accuracy by Segment**

<b>Automotive Services</b>	90%
College/University	83%
Health/Hospital	81%
Government (Non-Military)	79%
Military	77%
Amusement	75%
<b>General Merchandisers</b>	74%
Primary/Secondary Schools	73%
Supermarket	72%
Transportation	71%
<b>Quick Service Restaurants</b>	69%
Lodging	69%
Industrial/Agriculture	67%
Recreation	66%
Drug Store	65%
<b>Full Service Restaurants</b>	64%
Wholesale	60%
All Other	57%
<b>Business &amp; Professional Services</b>	56%
Street Vendor	54%
Leisure	50%
Other Eating & Drink	47%
Bar/Tavern/Licensed	39%
<b>Retail Specialty Services</b>	38%
Specialty Food Store	36%

#### **Prediction Accuracy**
